NIS CHAPTER IX MEMO NO. 5
(REVISION)

DATE 26 August 1960

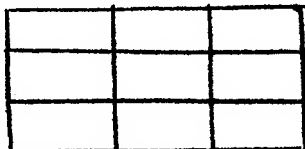

MEMORANDUM FOR: NIS Chapter IX Contributors

SUBJECT : Graticule Information

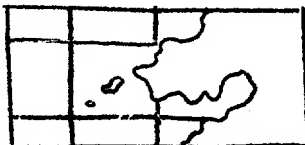

1. The definition of "graticule" accepted for Chapter IX use is as follows:

The network of lines which represents geographic parallels and meridians.

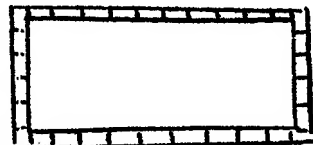

2. Some of the variations in presentation of graticule information are given below. The variations are listed in descending order of significance, based on the amount of information supplied by each.

GRATICULE

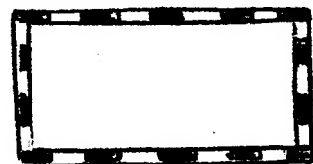

PARTIAL GRATICULE

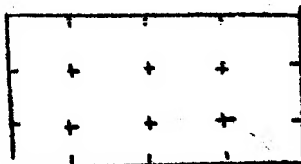

MARGINAL GRATICULE INDICATORS

or

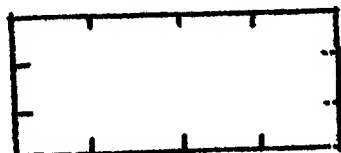

SHADED GRATICULE BORDER

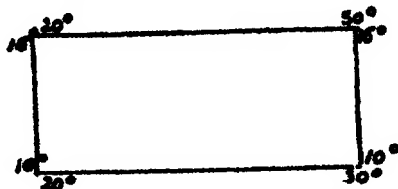

GRATICULE TICKS

30 AUG 1960

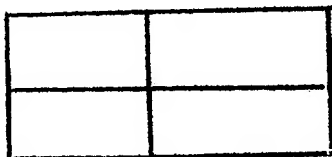

NIS CHAPTER IX MEMO NO. 5 (con.)

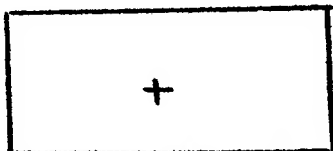

MARGINAL GRATICULE TICKS

CORNER GRATICULE COORDINATES

SINGLE PARALLEL AND MERIDIAN

SINGLE GRATICULE TICK

3. If a map or chart has a full graticule, give "graticule" alone in the citation.

4. If a single sheet, map, or chart has more than one of the variations, give the one that is the most significant.

5. If the sheets of a series contain different variations of graticule information -- one variation to a sheet -- list in the citation all the variations encountered, with "or" as the conjunction. For example, "graticule or marginal graticule ticks."

6. If no graticule information is indicated, give "no graticule information" (not "no graticule") in the citation.
